Treasure Your Health
Prevention • Detection • Enhancement
Treasure Your Health

Health screening is essential for the early detection of diseases and conditions that cause disability and death. The lifestyle and stress of modern living can have an adverse impact on our health by predisposing us to silent killers such as heart disease, diabetes, hypertension and cancers. Therefore, health screening is vital as it detects diseases, which do not produce early warning signs.

With personalised attention from our dedicated team of healthcare professionals, our aim is to enhance your well-being and help you better understand your state of health. Our health screening services are suitable for both individuals and employees of corporate organisations.

You will receive a detailed individualised medical report. This will be reviewed during a private consultation with your doctor, who will explain and provide you with suitable recommendations based on your health profile.

You should take charge of your health through regular health evaluations to prevent any potential health risks. Early detection allows diagnosis and management of illnesses to be done appropriately. When all that is taken care of, your health and wellness is then enhanced to achieve your lifestyle aspirations.

Raffles HealthScreeners - a dedicated health screening centre that offers holistic and personalised approach to your well-being. With over 30 years of experience, our professional team offers quality one-stop comprehensive health screening services.

Enjoy a healthy breakfast buffet after your tests, attend to your business needs or surf the web with free wifi within the hospital. We aim to make your visit with us worthwhile and comfortable.

Raffles Hospital is a tertiary hospital that is equipped with advanced imaging modalities. Modalities that are available include

- Computer Tomography Scanning
- Magnetic Resonance Scanning and
- Positron Emission Tomography.

During your health screening consult, you can discuss with our doctors regarding your health needs. Where appropriate, our doctors can assist with arranging the advanced imaging to address your health concerns.

For more information and to make your appointment on any of our health screening packages presented in this brochure, please call us at 6311 1222.
Raffles HealthScreeners - Besides Raffles HealthScreeners located at Level 12 of Raffles Hospital, you can also choose to have your health screening done at any of our Raffles Medical Clinics.

Please refer to the following table on the availability of different screening packages at our clinics:

1. Raffles Allergy Exclusive Panel
2. Raffles Food Allergen
3. Raffles Inhalative and Food Allergen

*All prices are inclusive of GST and subject to changes without prior notice. Items in packages are non-refundable if declined.*
Preparations

- Fast for at least eight hours. Please refrain from consuming food the night before your appointment. **Drinking of plain water is permissible.**
- Postpone your routine morning medication until your blood sample is taken. Please bring your medication with you.
- For ladies - Pap smear, urine and stool tests should be done at least 5 days after the last day of menstruation and before the next cycle.

If you are menstruating on the day of your appointment, please inform the nurses on arrival. You will not be able to do your urine, stool and Pap smear tests because the presence of blood in these tests would produce inaccurate results. The Pap smear test can be arranged to be done on the day of your review.

Useful Information

**Multiphasic Blood Tests**
A series of blood tests to screen conditions such as gout, thyroid, dysfunction, anaemia, etc.

**Tumour Markers**
A series of blood tests to detect cancer markers that may be produced by some cancer cells. These are available for liver, colon, pancreas, prostate, ovarian and nose.

**Urinalysis**
A test to infer the state of kidney function as well as of the urinary tract.

**Stool Analysis**
A test to screen for blood in the stool, a recognised manifestation of colorectal cancer (stool occult blood test) or for parasitic infection (stool FEME test).

**Pap Smear**
A test to screen for cervical cancer in women. Pap smear is an indicated test for a woman who has ever been sexually active. It is a test to screen for cervical cancer in women. It is not a required test if you never had sexual intercourse. You can speak to our doctors and staff if you are unsure. Kindly provide your consent for the Pap smear test to be done.

**Cardiac Assessments**
Screenings through resting ECG and treadmill stress test to assess for presence of coronary heart diseases.

**Ultrasound Scrotum/Testes**
Examines and detects the presence of any structural abnormalities within the scrotal sac and testicles in men.

**Ultrasound Prostate**
Examines and detects any enlargement of, or presence of growth within, the prostate gland in men.

**Ultrasound Thyroid**
Examines and detects the presence of any structural abnormalities within the thyroid gland.

**Ultrasound Kidneys**
Examines and detects the presence of any structural abnormalities of the kidneys.

**Ultrasound Abdomen**
Examines and detects any structural abnormalities of abdominal organs including the liver, gall bladder, spleen, pancreas and kidneys.

**Ultrasound Pelvis**
Examines and detects the presence of any structural abnormalities in the pelvic organs such as the uterus and ovaries in women.

**Ultrasound Thyroid**
Examines and detects the presence of any structural abnormalities within the thyroid gland.

**Ultrasound Breast**
Examines and detects any structural abnormalities within the breast.

**Ultrasound Hepatobiliary System (Liver)**
Examines and detects the presence of any structural abnormalities of the liver and gall bladder.

**Stool Analysis**
A test to screen for blood in the stool, a recognised manifestation of colorectal cancer (stool occult blood test) or for parasitic infection (stool FEME test).

**Pap Smear**
A test to screen for cervical cancer in women. Pap smear is an indicated test for a woman who has ever been sexually active. It is a test to screen for cervical cancer in women. It is not a required test if you never had sexual intercourse. You can speak to our doctors and staff if you are unsure. Kindly provide your consent for the Pap smear test to be done.
