

Treasure your health

Prevention • Detection • Enhancement

Raffles Health Screening 2023

Treasure Your Health

Prevention. Detection. Enhancement.

Health screening is essential for the early detection of diseases and conditions that cause disability and death. The lifestyle and stress of modern living can have an adverse impact on our health by predisposing us to silent killers such as heart disease, diabetes, hypertension and cancers. Therefore, health screening is vital as it detects diseases, which do not produce early warning signs.

With personalised attention from our dedicated team of healthcare professionals, our aim is to enhance your well-being and help you better understand your state of health. Our health screening services are suitable for both individuals and employees of corporate organisations.

You will receive a detailed individualised medical report. This will be reviewed during a private consultation with your doctor, who will explain and provide you with suitable recommendations based on your health profile.

You should take charge of your health through regular health evaluations to prevent any potential health risks. Early detection allows diagnosis and management of illnesses to be done appropriately. When all that is taken care of, your health and wellness is then enhanced to achieve your lifestyle aspirations.

Raffles Health Screeners - With over 40 years of experience, Raffles Health Screeners offers holistic and personalised health screening services at our group of executive health screening centres located around the island. Our team of professionals is dedicated to making your visit with us worthwhile and comfortable. With complimentary Wi-Fi service available, you can also surf the web or attend to your business needs.

Raffles Hospital is a tertiary hospital that is equipped with advanced imaging modalities. Modalities that are available include

- Computer Tomography Scanning
- Magnetic Resonance Scanning and
- Positron Emission Tomography.

During your consultation with our doctors, you can share your health concerns with our doctors. Where appropriate, our doctors can arrange for advanced imaging to address your health concerns.

For more information and to make your appointment on any of our health screening packages presented in this brochure, please call us at **6311 1222 (24-hour hotline)**.

Deluxe **\$531**

For Men

LABORATORY ANALYSIS

- Tumour Marker
- Prostate (PSA)

For Ladies

LABORATORY ANALYSIS

- Tumour Marker
- Ovarian (CA 125)
- B-HCG

PHYSICAL EXAMINATION & ASSESSMENT

- Consultation & Physical Examination by Doctor
- Body Fat Measurement
- Height / Weight / BMI
- Visual Acuity
- Medical Report
- Post Examination Review by Doctor

LABORATORY ANALYSIS

- Complete Haematological Parameters
- Erythrocyte Sedimentation Rate (ESR)
- Liver Function Test
- Kidney Function Test
- Blood Glucose
- HbA1c (Diabetic Screening)
- Lipid / Cholesterol Profile
- Gout (Uric Acid)
- Thyroid Screen: Free T4 & TSH
- Bone Mineral Status: Calcium & Phosphate
- Rheumatoid Factor
- Hepatitis A Screening
- Hepatitis B Screening
- Tumour Marker - Liver (AFP)
- Tumour Marker - Colon (CEA)
- HIV Screening
- Venereal Disease (VDRL / TPHA)
- Urinalysis
- Stool Occult Blood

RADIOLOGY TEST

- Chest X-ray

OTHER CLINICAL ASSESSMENT

- 12-lead Resting Electrocardiogram (ECG)

Select your health screening package via
<http://bit.ly/rmghealthscreening>

All prices are inclusive of GST and subject to changes without prior notice. Items in packages are non-refundable if declined.

*Base Laboratory Tests includes: Complete Haematological Parameters, ESR, Liver Function Test, Kidney Function Test, HbA1c (Diabetic Screening), Lipid/Cholesterol Profile, Gout (Uric Acid), Thyroid Screening, Bone Mineral Status, Autoimmune Disease Screening - Rheumatoid Factor, Hepatitis A and B Screening, HIV screening, Venereal Disease, Urinalysis, Stool Occult Blood.

Preparations

- Fast for at least eight hours. Please refrain from consuming food the night before your appointment. **Drinking of plain water is permissible.**
- Postpone your routine morning medication until your blood sample is taken. Please bring your medication with you.
- For ladies - Urine and stool tests should be done at least five days after the last day of menstruation and before the next cycle.

If you are menstruating on the day of your appointment, please inform the nurses on arrival. You will not be able to do your urine and stool tests because the presence of blood in these tests would produce inaccurate results.
- Fasting is mandatory for patients who will be undergoing the ultrasound abdomen test. While taking the test, you may feel some slight discomfort and the conducting gel may feel cold and wet.
- Before undergoing a pelvic ultrasound, you will be required to drink several glasses of water and to avoid urinating for about one hour prior to the examination time. When the bladder is full, it forms a convenient path, known as the acoustic window, for the ultrasonic waves.
- Do not wear any deodorant, perfume, powder or cream under your arms or chest area as it may interfere with the quality of the mammogram. Please bring old mammographic films if you have any.
- If you are taking the treadmill test, bring along an additional change of clothes and appropriate footwear. Medications such as beta-blockers (eg. propranolol or atenolol) should preferably be stopped three days before the test date.
- Patients are to fast for at least two hours before undergoing Mastrocheck®.

Useful Information

Mastrocheck®

Mastrocheck® is a blood-based breast cancer detection test. Developed by South Korea-based Bertis, Mastrocheck® is the world's first proteomics-based early diagnostic test for the disease. It is a convenient method that requires only a small amount of blood.

Multiphasic Blood Tests

A series of blood tests to screen conditions such as gout, thyroid, dysfunction, anaemia, etc.

Tumour Markers

A series of blood tests to detect cancer markers that may be produced by some cancer cells. These are available for liver, colon, pancreas, prostate, ovarian and nose.

Urinalysis

A test to infer the state of kidney function as well as of the urinary tract.

Stool Analysis

A test to screen for blood in the stool, a recognised manifestation of colorectal cancer (stool occult blood test) or for parasitic infection (stool FEME test).

SurePath™ Liquid-based Pap Test

The BD SurePath™ Liquid-based Pap Test is intended for use in the screening and detection of cervical cancer, precancerous lesions and atypical cells. This test uses modern technology by removing debris such as blood, mucus and inflammatory cells, aiding in visualisation of diagnostically relevant cells and reducing patient callbacks.

Cardiac Assessments

Screenings through resting ECG and treadmill stress test to assess for presence of coronary heart diseases.

Ultrasound Abdomen

Examines and detects any structural abnormalities of abdominal organs including the liver, gall bladder, spleen, pancreas and kidneys.

Ultrasound Pelvis

Examines and detects the presence of any structural abnormalities in the pelvic organs such as the uterus and ovaries in women.

Ultrasound Thyroid

Examines and detects the presence of any structural abnormalities within the thyroid gland.

Ultrasound Scrotum / Testes

Examines and detects the presence of any structural abnormalities within the scrotal sac and testicles in men.

Ultrasound Kidneys

Examines and detects the presence of any structural abnormalities of the kidneys.

Ultrasound Hepatobiliary System (Liver)

Examines and detects the presence of any structural abnormalities of the liver and gall bladder.

Ultrasound Prostate

Examines and detects any enlargement of, or presence of growth within, the prostate gland in men.

Breast Examination

• Ultrasound Breast

Recommended for women before the **age of 40** especially if you detect any breast changes. It is also useful to be added onto a mammogram screening to increase the chances of detection of breast cancer.

• Mammogram

An X-ray of the breasts for breast cancer screening. In Singapore, It is recommended that women **aged 40 - 49** should go for mammography screening once a year, and women above 50 should go once every two years. Please bring along any old mammographic films, if available, for comparison.

Tonometry

A test to assess the pressure of the eyeball and test for glaucoma.

Food Allergy Panels

• Raffles Allergy Exclusive Panel

Dermatophagides pteronyssinus, Dermatophagoides farina, Blomia tropicalis, Cat, Dog, Feather mix, Egg white, Sesame seed, Soya bean, Milk (Pasteurized), Crab, Shrimps, Wheat flour, Cuttlefish, Egg yolk, Chicken, Nut mix, Shellfish mix, Cockroach, Mould fungi mix 1.

• Raffles Food Allergen

Hazelnut, walnut, almond, milk, egg white, egg yolk, casein, potato, celery, carrot, tomato, cod fish, crab, orange, apple, wheat flour, rye flour, sesame seed, soya bean.

• Raffles Inhalative and Food Allergen

Dust mites, alder pollens, birch pollens, hazel pollens, grass pollens, rye pollens, mugwort, plantain, cat, horse, dog, Alternaria alternata, egg white, milk, peanut, hazelnut, carrot, wheat flour, soya bean.
